S I R :

INFORMATION DISCLOSURE STATEMENT

Enclosed is the International Search Report (3 pages) from the European Patent Office as the international searching authority from the present international application listing 13 references and their relevant portions.

In the International Search Reports the references listed in category A mean that these references define the general state of the art which is not considered to be of particular relevance with respect to the listed claims. The references listed in category X means each document is of particular relevance; the claimed invention cannot be considered novel or can not be considered to involve an inventive step when the document is taken alone with respect to the listed claim. The reference listed in category P means the document was published prior to the international filing date but later than the priority date claimed. The International Search Report is also in English and points out relevance of the references so no further relevance is

necessary to be pointed out.

Since the International Search Report is in English and the relevant portions of these references are pointed out there in English, no further pointing out of relevance is needed.

One of the references, namely WO/00424 is also disclosed and discussed on specification pages 13+. One reference namely EP 0 791 163 B1 is disclosed and discussed on specification page 1+.

Two PTO-1449 forms are presented listing all 14 references including the two references disclosed in the specification. Translations of the foreign language references are not available to the undersigned.

This submission meets the requirements of 37 CFR §1.56, 1.97 and 1.98(a) and MPEP 609.

Respectfully submitted  
Klaus Fieback, et al

by:

MARTIN A. FARBER
